Scott Phillips
AMAZING HORSE COUNTRY

Calculating Participant Cost

Our goal is to keep workshops accessible and focused on horsemanship. Participants should feel confident that they are paying a fair and transparent price for the experience.

If participant fees are significantly higher than those typically charged for Amazing Horse Country workshops, we may choose to provide a cost breakdown in promotional materials and on our website. For example:

• Workshop Fee: $450
• Facility/Arena Fee: $300

This transparency helps participants understand exactly what their fees cover and ensures the workshop is represented accurately.

Here is a super easy way to figure out what to charge participants. Amazing Horse Country will need to know several numbers from you as soon as possible, so that we can create a poster for you and put your workshop on the website.

These numbers are:

- Cost of the workshop
- Cost of stalls (and any options)
- Any other costs

Cost of the workshop

This starts from the cost we'll have given you for the workshop. For example, let's say we quoted you the following:

Workshop Cost:	$4,000
Travel:	$500
GST:	$225
Total:	**$4,725**

Now we add your costs. For example, let's say you need $1000 for arena fees. If you are paying GST, make sure you include it in that number.

The total is now:

$4,725 + $1,000 = $5,725

Simply divide that by the number of people in your workshop:

$5,725 / 8 = $715.63 (includes GST)

Of course, you can round that up or down to get rid of the cents, for example: $715.

Cost of stalls

If you are charging a cost for stalls or pens for guest horses, share that number with us and we'll add it to the poster and workshop information we share on our website.

Other costs

Anything else that might be an optional cost that you'd like participants to know about ahead of time, for example: a fee for plug in camping stalls.

Avoid optional costs that are unrelated to the workshop.
